Viacheslav Chudaev

Senior Unity Gameplay Engineer

Portland, OR · contact@vchudaev.dev · linkedin.com/in/vchudaev

Authorized to work in the U.S. without visa sponsorship.

SUMMARY

Unity gameplay engineer with **11 years of software development experience**. Builds gameplay systems, multiplayer features and designer tools for mobile and PC/MMO projects, from prototype to live operations. **Tripled monthly revenue** on a live title, successfully developed projects from scratch and led a four-developer team. Passionate about UI, gameplay systems and tools.

TECHNICAL SKILLS

Core: C#, Unity, SOLID, ECS

Gameplay: Core & meta gameplay, abilities, UI, behavior-tree AI, NPCs, multiplayer, network sync, tools

Live operations: Unity IAP, IronSource, AdMob, AppsFlyer, Firebase, CI/CD, iOS & Android releases

Performance: Unity Profiler, Xcode Memory Profiler, memory, frame-rate & UI optimization

Data: SQL, database design, stored procedures, client-server architecture, player-data migration

UI: UGUI, NGUI, complex, adaptive and responsive interface design & implementation pixel perfect

EXPERIENCE

Visionary Realms

September 2025 – September 2026

Unity Gameplay Engineer | Remote

Pantheon: Rise of the Fallen | 3D High-fantasy MMORPG

- Owned **end-to-end development of the mail and market systems**: database schemas, stored procedures, network serialization and UI.
- Designed SQL schemas and executed a large-scale player-data migration across a shared MMO codebase.
- Refactored and tuned the open-world climbing system.
- Built new abilities, including graph-node logic and supporting runtime functionality.
- Fully refactored abilities loadout panel: added customization and increased usability.

Cubic Games

June 2023 – June 2024

Unity Gameplay Engineer | Remote

Block City Wars 2 | 3D Open-world multiplayer mobile game

- Developed **behavior-tree NPC AI with ECS** for peaceful and hostile open-world characters.
- Built weapon and vehicle customization and upgrades, a character editor, and adaptive NGUI UI.
- Owned multiplayer support and **network synchronization** for all delivered features.
- Created designer tools for configuring NPCs, districts, spawners and waypoints.

Ciprosoft

October 2022 – June 2023

Lead Unity Gameplay Engineer | Remote

Dragon Game | 2D RPG battler prototype

- **Led a four-developer team**, owning planning, estimates, delivery and technical interviews.
- Owned prototype architecture and technical implementation, adapting to frequent design pivots.
- Implemented combat, abilities, character customization, inventory, UI, VFX and SFX systems.

ChillBase June 2020 – October 2022

Unity Gameplay Engineer | In-Site

Combat Quest | 3D Mobile action RPG

- **Tripled monthly revenue** by reworking the in-game offers system.
- Built PvP gameplay, refined the ability system, and created VFX and SFX systems.
- **Reduced memory usage to restore support for older devices**; optimized graphics and UI.
- Implemented advertising, battle pass and daily tasks; reworked cross-store payment processing.
- Delivered meta-gameplay systems, including cutscenes, a global map and tutorials.
- Owned CI/CD and shipped iOS and Android releases.

Moscow Factory of Thermal Automatics May 2015 – June 2020

Software and Hardware Engineer | In-Site

SuperSCADA (2018–2020) | Unity industrial application for PC and mobile

- The prototype won a Skolkovo grant.
- Owned core architecture.
- Built an IDE-style, dockable, adaptive UI.
- Responsible for graph and code editors for FBD, LD and ST languages.
- Tested and deployed across multiple target environments.

Earlier work (2015–2018):

- Built platform for property management companies and tenants using Angular,
- Implemented new editor features to IDE applications using WPF.
- Developed controller firmware supporting RS232/RS485 and Modbus.

EDUCATION

RTU MIREA | Bachelor of Science in Information Technology 2012–2016
